

Lantern[®] Hip

The next evolution of **hip technology** is in your hands.

ACCURATE

Personalized implant position:

Dynamically compare the functional pelvic plane with the anterior pelvic plane and coronal plane for cup position.

Leg length & offset restoration:

Seamlessly measure and restore leg length and offset, helping you achieve your surgical plan.

SIMPLE TO USE

Use it anywhere:

Bring it to your ASC or hospital: any OR, any implant, with the convenience of no extra capital cost.

Choose the technology that gives you the accuracy you and your patients deserve.

WORKFLOW OVERVIEW

1

Surgical plan

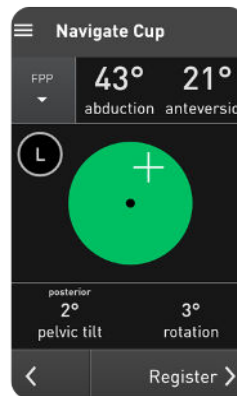

Customize your patient-specific plan and preferred workflow.

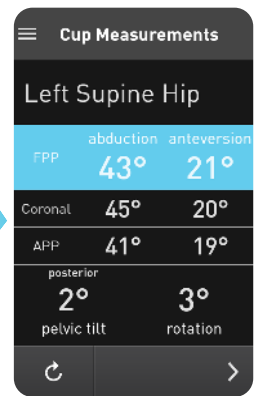

Proceed through quick-registration.

2

Cup placement (Trial-assist)

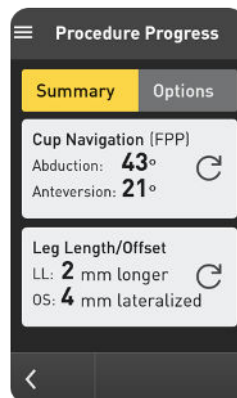

Navigate cup, comparing FPP vs APP vs coronal plane in real time.

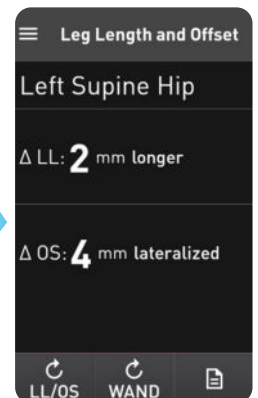

Assess cup position and repeat navigation if desired.

3

Leg length & offset (Trial-assist)

Review change in leg length and offset and repeat if desired.

Confirm your completed surgical plan and conclude.
